

SIZE CHART

To determine your ring size, wrap a ribbon or string comfortably around your finger, mark the intersection, measure the length, and look up the size in a ring size chart. In the absence of exact measurements, opt for the next larger size. Note that finger size can vary due to temperature, seasons, and indoor/outdoor conditions. Measure at different times of the day and take the average for accuracy.

If you already have a well-fitting ring for the same finger, measure the diameter on the inside of the ring with a ruler or tape measure. The number of millimeters you measure is the diameter size.

CIRCUMFERENCE OF YOUR FINGER	RINGSIZE (EU)	DIAMETER/ SIZE
44 MM	44	14
46 MM	46	15.5
47 MM	47	15
48 MM	48	15.25
49 MM	49	15.5
50 MM	50	16
51 MM	51	16.25
52 MM	52	16.5
53 MM	53	17
54 MM	54	17.25
55 MM	55	17.5
56 MM	56	17.75
57 MM	57	18
58 MM	58	18.5
59 MM	59	18.75
60 MM	60	19
61 MM	61	19.5
62 MM	62	19.75
63 MM	63	20

CARE INSTRUCTIONS

Make sure to store your jewelry securely when not wearing it. Because silver naturally oxidizes when exposed to moisture, sunlight, or oxygen, it's advisable to place your jewelry back in its original packaging between uses.

It's normal for silver or gold jewelry to lose its shine or oxidize over time. To maintain their beauty, we recommend regular use of a soft polishing cloth and safe storage. Avoid storing them in the bathroom and refrain from wearing them while sleeping, applying perfume, or cosmetics. For a thorough cleaning, you can contact us via email.
